Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

NAMES AND LABELS

Image elements do not have [alt] attributes

Links do not have a discernible name

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

Background and foreground colors do not have a sufficient contrast ratio.

These are opportunities to improve the legibility of your content.

INTERNATIONALIZATION AND LOCALIZATION

<html> element does not have a [lang] attribute

These are opportunities to improve the interpretation of your content by users in different locales.

NAVIGATION

Heading elements are not in a sequentially-descending order

These are opportunities to improve keyboard navigation in your application.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on Core Web Vitals. Learn more about Google Search Essentials.

MOBILE FRIENDLY

Does not have a <meta name="viewport"> tag with width or initial-scale No <meta name="viewport"> tag found

Document doesn't use legible font sizes Text is illegible because there's no viewport meta tag optimized for mobile screens.

Tap targets are not sized appropriately Tap targets are too small because there's no viewport meta tag optimized for mobile screens

Make sure your pages are mobile friendly so users don't have to pinch or zoom in order to read the content pages. Learn how to make pages mobile-friendly.

CONTENT BEST PRACTICES

Document does not have a meta description

Image elements do not have [alt] attributes

Format your HTML in a way that enables crawlers to better understand your app's content.
